## Education

### D. Y. Patil College of Engineering

Pune, India

B.E. IN COMPUTER ENGINEERING

2022

- CGPA: 9.7/10

## Skills

**Languages** C/C++, Java, Python, JavaScript

**Technologies** HTML, CSS, React, Redux, Node JS, Express JS, REST API, Tailwind CSS, Bootstrap

**Deployment** Git, Github, Heroku, Vercel

**Databases** SQL, MongoDB

**Familiar** Spring, Spring Boot, Solidity, Web 3.0

## Work Experience

### Great Software Lab

Pune(MH), India

SOFTWARE ENGINEER

Aug. 2022 - Present

- Developed a utility using Java and OneLogin APIs to automate user onboarding and offboarding processes, streamlining the creation and deletion of users on the OneLogin Platform.
- Improved the functionality of the OneLogin Java SDK by developing a custom package, enabling the organization to leverage advanced features and optimize user management workflows.
- Integrated various applications with the OneLogin platform, ensuring secure access through SSO and implementing provisioning workflows for automated user creation in integrated applications.
- Collaborated in a team of three to develop a SAML Mini Identity Provider using Flask and Python for the backend, and React for the frontend UI, enabling a customer IAM flow.
- Collaborated closely with clients to deliver Onelogin and IAM-related services, understanding their requirements and providing tailored solutions to meet their needs.

### Great Software Lab

Pune(MH), India

SDE INTERNSHIP

Sept. 2021 - Jul. 2022

- Implemented a RESTful API server in Spring Boot for an Employment Management System, enabling efficient management of user details and learned skills within the Spring Boot framework. • Built an Employment Management System with React and above RESTful API.
- Created a visually appealing and intuitive Employment Management System using React, resulting in improved user experience and increased productivity for HR professionals.
- Designed and implemented a module to seamlessly integrate customized email notifications into the live server code, enhancing communication and user engagement during the onboarding process.
- Collaborated closely with clients to deliver Onelogin and IAM services, understanding their requirements and providing tailored solutions to streamline user authentication and access management.

### Co.Lab

Remote

SOFTWARE DEVELOPER

Mar. 2023 - May 2023

- Collaborated with a team of 4 professionals, including product managers, designers, and software engineers, to develop a groundbreaking software product.
- Designed and developed a writing application targeting writers of all levels, offering effective strategies to overcome writer's block.
- Implemented a unique feature enabling users to engage in short sprints of focused writing on provided prompts or their own ideas.
- Developed a user-friendly interface that allows writers to easily showcase their completed works and receive feedback from a community of fellow writers.
- Improved the productivity of writers by providing them with a structured platform to overcome writer's block and enhance their writing skills.

## Projects

### Slat | React, MantineUI, ExpressJS, NodeJS, MongoDB

PROJECT | GITHUB

- A Workflow Management System that makes use of Kanban Boards to facilitate task management.
- Securely Login using JWT Authentication
- Invite your teammates and coworkers via Personalized Email
- Explore the user via their Profile page depicting user skills and abilities.
